## Message from the Secretary

Scientific exchanges on rapeseed are more and more active. I shall only mention exchanges with China and India which are intensifying and the growing interest of the USA for rapeseed.

The G.C.I.R.C. and the different rapeseed Conferences have contributed to the success of such exchanges and we can be pleased with this situation.

1987 will be the year of the 7th International Rapeseed Conference in Poznan, Poland. I am sure that this Conference will mark a new step in promoting this remarkable crop, rapeseed.

We are also convinced that our Polish friends will do their best to lead us to appreciate their countries, their wonderful city of Poznan and its region rich with a long history. Therefore, we hope that many people will attend the 7th International Rapeseed Conference and we hope that scientific exchanges will be fruitful for everybody.

Looking forward to meeting you there, let the G.C.I.R.C. -- Secretary wish you a Happy New Year 1987 and many discoveries and progress concerning rapeseed.

The Secretary  
Emile Choné
